Subject: Concerns regarding impacts of ESRD plans

I've just become aware ESRD patients are being discriminated against. We've worked hard to ensure adequate services and treatment is available without the danger of being compromised. I am extremely upset some Oregon insurance companies are trying to make changes to the 2016 plans which will greatly impact patients of kidney treatment. I feel this allows companies to discriminate and single out this population. You cause grave harm by removing patient insurance choice and will bring about added financial burden. This is not proper and reeks of being underhanded. Shame on you! I urge you to act appropriately and ensure these changes and plans do not be sold in Oregon.
